Sync media from multiple devices with AllShare

AllShare™ syncs your digital devices so you can enjoy music, movies and photos from your PC, camera and mobile devices, on your larger TV screen. Connects you to multiple PCs, as well.

Reduce blur with Auto Motion Plus

Auto Motion Plus 120Hz™ brings action movies and sports to life in the living room, thanks to frame-to-frame smooth motion. This technology eliminates motion blur by calculating the image and inserting it, creating a non-repetitive transition from one frame to the next.

Images pop with Mega Dynamic Contrast Ratio

Mega Dynamic Contrast Ratio provides crisp images with sharper details so that scenes pop off the screen. This dynamic contrast ratio yields a pure prism of color - from the deepest blacks - to the brightest whites.

Ultra Slim Design (1.18" deep)

The latest HDTV technology inside an innovative, razor-thin design only 1.18" deep. These ultra-slim LED TVs are supported by a unique stand and crystal-clear neck, and conveniently fit in any room, allowing more room for other electronic "toys" and equipment.

Ultra Clear Panel reduces reflections

Ultra Clear Panel absorbs the available light in a room whether it's from natural or mechanical sources, and eliminates reflections. Colors are more vibrant, blacks are deeper and contrast is enhanced.

Sharp images and bright colors with Full HD 1080p

In the 1920x1080 full high definition resolution, 1,080 horizontal lines create sharp details and crystal-clear, smooth motion for the brightest, boldest colors and realistic picture.

Smart light sensor reduces energy

Unique light sensor measures the intensity of a room's light and automatically adjusts screen brightness. If the ambient light is sunny, the picture shines brighter; in darker surroundings, the intensity is reduced.
