## Smart TV with Web Connected Apps & Web Browser

Samsung Smart TVs allow you to easily search for movies, TV shows, browse the web, explore Samsung apps, chat with friends and find many other types of new interactive TV content.

Samsung Apps is a growing collection of premium apps specifically built for your TV that connects you to your favorite digital content such as movies from Netflix or Blockbuster, TV shows from Hulu Plus, videos from YouTube, Next Level sports information from ESPN, Music from Pandora, and social updates from Facebook or Twitter. The Samsung LED 7000 Series Smart TV also includes a Full Web Browser to navigate the internet, a Search All feature so you can find videos via apps or other connected devices and a recommendation engine which suggests movies you might like from your Video-On-Demand services. Samsung Smart TVs allow your digital experiences to converge on a brilliant HD screen.

## Captivating 2D & 3D in Full HD 1080p

Whether you are viewing a premium-quality 2D picture or seeing incredible 3D depth, images are breathtakingly real in Samsung Full HD.

Enjoy superb 2D 1080p clarity, deep rich blacks with Ultra Clear Panel and detailed contrast with advanced dimming technology. Samsung 3D utilizes active shutter glasses which is the only way to experience 3D in Full HD 1080p (when coupled with a 3D source such as a Samsung 3D Blu-ray player or a Full HD broadcast from satellite or cable providers). Samsung 3D TVs also offer a unique feature that allows you to intensify your 2D viewing experience by upconverting it to immersive 3D\*.

\*Full 3D experience requires 3D-native content; conventional 2D content can also be upconverted to near-3D image quality.

Clear Motion Rate (CMR) is Samsung's more comprehensive and accurate measure for how well an LCD or LED TV can display fast-moving images. Previously, motion clarity was expressed simply by the refresh rate, measured in Hz. CMR, however, takes into account all three factors that contribute to motion clarity: panel refresh rate, image processor speed and backlight technology. CMR is measured by determining the thinnest line a TV can display in a moving image. The thinner the line, the higher the CMR rating, and the clearer the picture you'll enjoy on the screen.

[Click here](#) to learn more about Clear Motion Rate.

## Virtually Edgeless Picture

Take TV to the edge with an incredibly slim (measurement) bezel that creates a virtually edgeless picture. The Samsung LED 7000 Series is a mere 1.2" deep which makes mounting the TV almost as easy as hanging a picture on your wall. If you choose not to mount your TV, the picture will float above the stylish swivel stand which can rotate to better suit your viewing angle. The Samsung LED 7000 pushes the limits of design and performance to give you a truly immersive viewing experience.

## Micro Dimming

Micro Dimming Technology shows detailed contrast across the screen with richer, brighter colors, whiter whites and deeper blacks. The Samsung LED 7000 Series Smart TV has a proprietary algorithm that adjusts brightness and contrast in select parts of the screen based on the image being displayed.

## Skype

Enjoy the convenience and connectivity of free, IP-based, picture-in-picture video calls via Skype\* right from the couch. View it all life size on a Samsung TV. \*Skype camera kit sold separately.

## Built-in Wifi

With built-in WiFi on your Samsung LED 7000 Series Smart TV, no additional equipment is needed to connect to the existing wireless router in your home network and start accessing content via Samsung Apps or other Smart TV features. If you do not have a wireless router at home, Samsung's wireless router (sold separately) provides unique connectivity options tailored to make working with your TV as easy as possible.

## Advanced DLNA Technology

Samsung's AllShare lets you sync up many of your DLNA-enabled digital devices so you can access music, movies and photos right on your Samsung TV screen. Files on your PC, camera and mobile devices can wirelessly and effortlessly be available right on your TV. The Samsung LED 7000 Series comes with built-in WiFi so it can easily be connected to your wireless network without any additional equipment.

## ConnectShare™ Movie

ConnectShare Movie lets you watch videos, play music or view photos from a USB drive. Simply plug your USB directly into your Samsung TV's USB port and watch on the big screen with friends and family.

## Ultra Clear Panel

Ultra Clear Panel absorbs ambient light and virtually eliminates reflections so there are no distractions in your viewing experience. Experience deeper blacks and enhanced contrast for crisper images and excellent shadow detail on your Samsung LED.

## Wide Color Enhancer Plus

Wide Color Enhancer Plus allows you to see picture color the way the director originally intended. Witness the entire RGB spectrum brought to life on your screen to bring you exceptionally vibrant, yet natural-looking images faithful to the director's original intent.

## Eco Sensor

Our unique Eco light sensor measures the intensity of the room's light and automatically calibrates the brightness of the image on the screen. In a sun-filled environment, the screen gets brighter and in dim surroundings, the intensity is reduced. This feature optimizes the viewing experience while also saving you a little energy.

## Swivel (Quad) Stand

Set up your Samsung TV perfectly with the built-in swivel stand. Samsung Swivel stands allow you to turn your TV around 10 degrees to the left or right to ensure you have a direct view of the TV no matter where you are sitting in the room.

## Anynet+

Take all your remotes and condense them into one simplified solution. With Samsung's Anynet+ you'll enjoy one-touch control for all your HDMI-connected compatible devices like your Samsung TV, Blu-ray Disc player, AV Receiver and Home Theater.

## HDMI

With HDMI, you can easily connect up to four compatible AV devices at the same time and replace AV cables with a single solution. An HDMI cable can replace anywhere from two to five cables so you can de-clutter your entertainment space with fewer wires.

## QWERTY Remote

The Qwerty Remote puts functionality in your hands like never before. One side of the remote has standard remote functionality and the other side has a qwerty keyboard that makes utilizing Samsung Smart TV features very easy. When you are ready to search, type or explore, you flip the remote to the keyboard side and you can enter in text in a quick & familiar way. On the qwerty keyboard side of the remote is a screen so you can see what you are typing without having to look at the TV.
