VANISHING TV MIRROR - A vision of elegance and technology

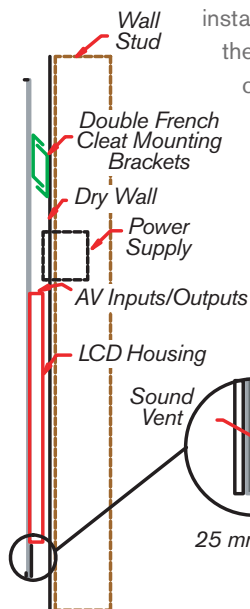

Unrivaled Technology • Discreet Sophistication • Infinite Possibilities

The HT Quant 1-inch LCD HDTV

HT Quant continues to revolutionize the industry with the development of a 17" LCD HDTV with a depth of only 1-inch. This has created a true plug and play product. Additionally, it provides the

ideal means for surface mount installation – proven to be the most attractive and cost-effective method available today.

By comparison, TV Mirrors using standard LCD's can result in an overall depth of up to 5 inches and require costly installations. If installation is compromised, these units can give a "medicine cabinet appearance" eliminating the mystery of the hidden television.

HT Quant Difference

Renowned for over 45 years of German engineering, HT Quant has established a reputation as one of the most respected manufacturers of consumer electronic products. With a legacy built on uncompromised attention to detail, HT Quant is among top-ranking choices in today's consumer, hospitality and commercial markets.

Sound is an essential part of the experience and is at the heart of HT Quant. HiddenReflections TV mirrors use the same high quality technology originally designed for HT Quant speakers. The speakers are meticulously incorporated into the television to offer optimum and premium sound reproduction.

For enhanced sound performance, optional external speakers are available with an in-ceiling or in-wall mount finish.

Senses

Innovation

Meets

Luxury

HiddenReflections™ Television Mirror

Mirrors add sophistication from the moment one enters a room. Introducing the HT Quant® HiddenReflections™ TV Mirror – an ultra thin vanishing television mirror that has the appearance of being an attractive natural mirror. When it is turned off, it shows only a mirror reflection. When the LCD is activated, it transforms into a window to the world.

Be both pleased and intrigued. The HiddenReflections series combines two technologies making it possible to add a television where it never seemed possible before.

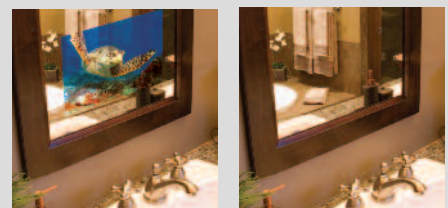

HT Quant TV Mirrors are available in a variety of sizes and styles from the innovative HiddenReflections ultra-thin series to a grand screen custom solution. These attractive mirrors will create just the right touch to any bathroom, foyer, entranceway or any desired viewing space. The perfect solution for anywhere you're looking to add a traditional mirror or television.

Innovative Mirror Technology

HT Quant has discovered how to modify the physical properties used in most conventional two-way mirrors. The result is a highly crafted mirror that provides a distortion free reflection and a clear, crisp color-precise television image capable of displaying up to 16 million colors.

This break-through mirror technology features our premier one-way glass and high index mirror technology for a natural reflection of color. As the brightest mirror and television combination on the market today, HiddenReflections offers the clearest and most vivid colors and mirror match. This results in the perfect platform for viewing high-resolution programming up close or at a distance.

Only continuous mirror reflection is visible when the LCD is deactivated or turned off.

Custom Hospitality

HiddenReflections TV Mirrors can be modified for any specific design requirement. There's a perfect fit for everyone with custom options of LCD screens ranging in size from a discreet 7 inches up to an impressive 65 inches.

Illumination can be added to any mirror for an enlightening experience.

Look to HT Quant for a complete line of Grand Screens, Illuminating TV Mirrors, Illuminating Mirrors and non-vanishing TV Mirrors.

Let our onsite consultants and engineers flawlessly take your most vibrant designs and develop them with meticulous precision. We have years of partnering experience with some of the most creative glass artisans and have successfully completed some the most challenging projects.
