Summer 2017

## **HiddenTelevision.com Mirror TV**

Our products include mirrors for the bedroom and living room which pass **flawless HD quality** straight through the mirror. Our bathroom mirrors have a **brilliant reflection** for shaving and applying makeup. Your space is meticulously crafted just for you and so are our products.

Contact Us: (419) 842-4554 - [sales@hiddentelevision.com](mailto:sales@hiddentelevision.com)

## **VanityVision Mirror TV**

Add **sophistication and elegance** to your bathroom instantly. An **ultra-thin LED TV** is built into the mirror, so no one would ever guess there's a TV hidden behind it until it's turned on. We will work with you to create any size to fit your bathroom, from small mirrors to entire walls. All you need to do is pick the television size and position. Our vanity mirror TV is extremely easy to install.

Contact Us: (419) 842-4554 - [sales@hiddentelevision.com](mailto:sales@hiddentelevision.com)

## VanityVision FAQ

### **How easy is it to install your VanityVision TV?**

The **installation is easy**, simply cut a recessed area in your wall and hang the mirror with the included hardware. Alternatively, you can buy the mirror by itself for a custom DIY project.

### **What kind of sound quality does it have?**

The speakers of the TV are clearly audible from around the edges if you can leave a slight gap of about 1/4" from the wall for the sound to escape. Optionally, you can install wireless speakers or ceiling recessed speakers.

### **How good is the picture quality?**

The VanityVision TVs are **LED** displays and the mirror allows a large amount of light to pass straight through the mirror, giving you the best possible video quality in **4k resolution**.

### **How do I hide the cables?**

The cables for a vanity mirror TV are typically hidden behind the walls by an electrician or A/V installer. Alternatively, you can use cable tunneling to string them in a channel that can be painted to match the wall.

### **What is the advantage of buying the full VanityVision system instead of just the mirror?**

Our VanityVision Mirror TV systems are ready to be installed without extra work. You can mount it on the wall, or a recessed area can be made for the TV and mount the mirror like a regular mirror on the wall. A custom project where you just buy our glass will require hiring a contractor to install it, which can cost more time and money.

### **How is it installed?**

We have **hundreds of dealers** across the USA & Canada, and many overseas.

### **How can I see the product?**

Our dealers have samples of our products, and you can see the products in action on our video gallery. We sell frame and mirror samples, so you can order a small piece first to try out before investing in the full product.

### **How fast can I get it?**

We ship the mirrors immediately and the complete systems take about two weeks to manufacture.

### **Where can the TV be positioned behind the mirror?**

When you order the system, you can specify the exact location you want it to be behind the mirror.

## **Samsung LED Mirror TV**

Our Mirror TV isn't simply a television, it is **functional art** that complements the design of your room. We combine the latest Samsung technology with stunning frame styles and highest quality dielectric mirror available. The framed televisions are **ultra slim** and are available in a wide variety of finishes to **blend seamlessly** with your décor. Installation is easy, you can mount them on your wall just like any flat screen TV.

The mirror televisions offer the latest display technology, providing the **most vivid picture available**. We offer sizes to fit any space, from 28" - 90", the most popular sizes being 55", 60", and 65". The TVs include Samsung Apps, which provides Gmail, Facebook, Twitter, YouTube, Netflix, Hulu, and Pandora.

# Mirror TV FAQ

## **How easy is it to install the Mirror TV?**

The Samsung LED Mirror TV installs exactly the same as a regular TV. You simply hang it on the wall with a slim profile wall mount and you're all done!

## **How good is the sound quality?**

The frame and glass don't block any of the sound, so you get the same **high fidelity sound** you'd get from any other flat screen TV.

## **How good is the picture quality?**

Our Samsung Mirror TV has 4k picture quality with full, vibrant color. Unlike other companies, we combine the brightest, thinnest televisions on the market with the most transparent mirror available to deliver **uncompromised picture clarity**.

## **Do I need to use a special wall mount?**

The included ultra slim profile wall mount we sell will keep your framed TV **within 0.4" of the wall** for a hidden, seamless appearance. If you were to use a standard wall mount, it might hang several inches away from the wall.

## **How do I hide the cables?**

For the best installation, string the cables back through the wall to hide them. Alternatively, you can use cable tunneling, which can be painted to match the wall. You can easily find cable tunneling at your local Home Depot or A/V installer.

## **What's the advantage of buying a complete mirror TV instead of just the glass?**

Our Samsung Mirror TV systems are as easy to install as any regular TV and are **beautiful pieces of functional art**. A custom project where you just buy our glass without the TV will require hiring a woodworker or cabinetmaker to frame it up, which can be expensive, requires more work, and takes more time.

## **How can I see the mirror TV in person before buying?**

We sell **frame and mirror samples** so that you can evaluate our products before investing in the full system. When installed, the only visible parts of the TV are the frame and mirror, so once you have seen the samples you know what it will look like. You can search for local installers and showrooms on our website.

# HiddenTelevision.com Smart Mirror

## Smart Mirror Technology

Imagine standing in front of your bathroom mirror and seeing all the information that is relevant to your life. Live weather forecasts, sports scores, and wall street reports can be seen at a glance. Talk to your mirror using a personal assistant such as Google Voice or Alexa, to play music, videos, add items to your shopping list, and much more.

## How does it work?

It combines our VanityVision Mirror, a TV, and a micro computer running Windows 10, Android, or Linux.

## How can I control it?

You can use your TV remote, a touchpad keyboard, or voice recognition technology such as Google Voice and Alexa which can listen for your commands and display the information you request.

## Can it be customized to fit my bathroom?

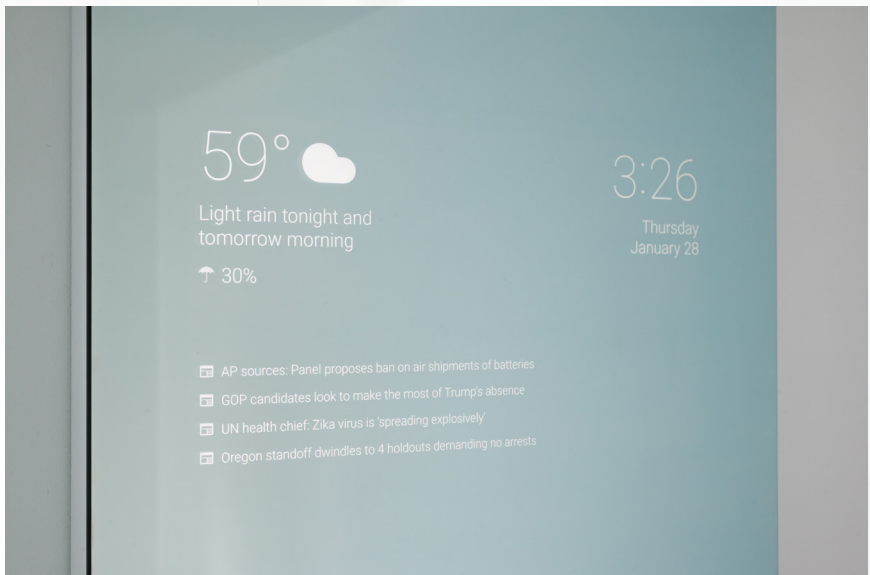

We can cut and ship sizes up to 96"x130" anywhere in the world. In addition, we are able to drill scone holes and temper, bevel, and polish the edges.

## Do you sell complete units?

We sell complete units which utilize a 4k Samsung LED TV. Check out [www.hiddentelevision.com/smart-mirror/](http://www.hiddentelevision.com/smart-mirror/) for more details.

Frameless smart mirror by Max Braun

Display weather forecasts, sports scores, Facebook updates, and more

# VanityVision Smart Mirror

The VanityVision Smart Mirror is the cutting edge of **hidden display technology**. It is the perfect balance of reflection and transparency, and offers superior quality compared with a two way mirror, providing a tint-free view of text and pictures.

*Smart Mirror Displaying Google News Reports*

## 2017 - The Year of the Smart Mirror

Michael Teeuw of Xonay Labs wasn't expecting the enormous explosion of interest when his Smart Mirror project went viral on Reddit. It started with a standard PC monitor, basic frame, Raspberry Pi and a two way mirror. Since then, he has developed open source software and a website [www.magicmirror.builders](http://www.magicmirror.builders) which is the definitive source for information on the Raspberry Pi Smart Mirror. The site provides a single, special line of code which installs the most popular Smart Mirror apps to a Raspberry Pi computer. Numerous software developers have since jumped on the opportunity to program their own modules for the site, which add features to the Pi. These recent advancements have streamlined Smart Mirror technology, making it easily accessible to both businesses and individuals.

*The original Magic Mirror by Michael Teeuw*

### **VanityVision Features**

- Best quality on the market
- 70% Reflective, 30% Transparent
- Close match to a standard mirror
- Careful packaging & fully insured
